Objective

Experienced Software Engineer with a background in Full-Stack Development and a focus on Scripting and Automation. Eager to leverage expertise across multiple programming languages, having delivered new features, database improvements, and automated testing systems.

Education

B.S.E. | University of Pittsburgh | Pittsburgh, PA | April 2018

- Major: Computer Engineering, with a focus on Software Engineering
- Engineering Honor Roll: Spring 2014, Fall 2016, and Fall 2017

Skill Set

- **Language:** Proficient in Python, Java, Javascript, Typescript, Angular and React frameworks; Experienced in Kotlin
- **Supplemental:** SQL, PostgreSQL, NoSQL, HTML/CSS, Docker, Gradle, Spring-Boot, Flask, Electron, Vite, XML/XPath, RegExp, Shell/PowerShell, Unix
- **AI/ML:** OpenAI API, Microsoft Azure AI, Prompt Engineering, Claude & Codex (AI-Assisted Dev)
- **Technical:** Full-Stack Angular Web Apps, Database Management (query refactoring, Flyway migrations), Automation, OOP & Functional Programming, Android Development, ML Fundamentals
- **Teamwork:** Agile/Scrum, Git/Hg/SVN, feature design with PMs, implementation experts, and clients, internal refactoring, library creation, automated test design (end-to-end and unit)
- **Certifications:** AWS Certified Cloud Practitioner

Work Experience

Full-Stack Engineer | Avalon Tax | Chatham, NJ | November 2025–January 2026

- Served as the first full-time engineering hire at an AI-focused tax-preparation software startup, driving development across the entire technology stack to stabilize the platform ahead of tax-season deadlines
- Leveraged AI-assisted development workflows (Claude) to increase engineering efficiency across feature implementation, debugging, and refactoring
- Designed and implemented full-stack functionality spanning Electron/React user interfaces and Python backend services

Career Break | New Jersey | January 2023–November 2025

- Took a planned break to travel, then relocated to provide full-time care for a family member through a serious illness
- Worked as a substitute teacher in 2025 while transitioning back to a full-time engineering role

Software Engineer T2 | 3M Health Information Systems | Pittsburgh, PA | July 2018–January 2023

- Designed, implemented, and maintained features throughout the HCC Collaborate application, enhancing the front-end web client (Angular), intermediate service layers (Java, Kotlin), and the database (PostgreSQL), improving system efficiency
- Designed, created, and maintained automated end-to-end testing and test-reporting systems using Typescript and C#, improving testing accuracy
- Built a self-updating demo environment that kept the sales team's demonstrations current with no manual upkeep
- Redesigned the database, reducing query times and replacing an expensive trigger-based update system with a live-data model that surfaced the most up-to-date information
- After senior departures, helped interview, onboard, and train new hires, growing the small team to 2x its original size
- Led the Angular 4 to 10 web-client upgrade, updating internal npm modules to improve performance

Co-Op with the Mesh Testing Team | Ansys Inc. | Canonsburg, PA | Spring 2015–Spring 2017

- Four semester-long co-op rotations on Ansys' 3D mesh simulation software, analyzing and reporting test-run data
- Self-taught Python on the job to automate the analysis and build the team's test-automation scripts
- Collaborated with the team to find new automation opportunities and deliver solutions that reduced manual workload
